Customers

How do PCs upgrade to an IBA with the new system?

Currently there is not a way to automatically upgrade an existing PC to an IBA. This is a great suggestion for further development!

If you need to upgrade an existing PC to an IBA, call into Globallee Customer Support to first deactivate the PC. Then they can enroll as an IBA. (This is because there can not be two accounts with the same email address).

No, all existing customers must create a Globallee HQ account.

Is there a time limit for customers to create a new Globallee HQ account?

There is no time limit to setup their new account with Globallee HQ.

If they begin the setup process, the custom “begin registration” link that is sent to their email does expire after one hour. To receive another email link, simply start the process over of going to myhq.globallee.com, selecting “create account” and entering their ID # and email address, this will trigger another email to send.

For Compensation Plan related questions, please go to the “My Resources” tab on your Globallee HQ to view the Compensation Plan documents.
